RESPONSE TO RESTRICTION REQUIREMENT

January 29, 2002

Hon. Commissioner for Patents
Washington, D.C. 20231

Sir:

Responsive to the Restriction Requirement (Paper No. 12 mailed January 3, 2002, Applicants elect Group X (claims 5-11 and 13-14). The claims are drawn to transformant plant cells, transgenic plants, and regenerative material with a gene encoding a protein having neoxanthin cleavage activity; methods for producing such transgenic plants; and methods for increasing or decreasing stress tolerance in a plant. Applicants reserve the right to prosecute the nonelected claims in a divisional application.

It should be noted that the characterization of the groups of claims is not correct. Only claim 8 refers to an increase in neoxanthin cleavage activity. The other claims do not recite this limitation.

Applicants earnestly solicit early examination on the merits.

Respectfully submitted,

NIXON & VANDERHYE P.C.
